School in Melbourne, VIC The success of our students stems from an inclusive culture where students, staff and parents cultivate a supportive, safe and friendly learning community. By fostering a love of learning and a commitment to high academic standards, our goal is that every student fulfills his potential. We hope to educate men interested in the problems facing our world and with the skills to do something about them. We remain true to AB Taylor's vision of a community school dedicated to educating young men for life and bring together the strength of tradition with an understanding of future demands. Our educational strategies are innovative and modern, with technology fully integrated across our curriculum for both teaching and learning. We also place great importance on helping our students to become responsible citizens. While the best facilities and teaching practices are crucial, it has also been the strength of our community that has given the school its reputation both locally and abroad. Over 125 years only nine Headmasters have presided over Camberwell Grammar School, a testament to our stability and longevity. Our curriculum Exposes students to a wide range of learning opportunities to help your son find his niche, Is complemented by co-curricular activities for out-of-classroom learning., Encourages activities beyond traditional 'male' pursuits, such as music and literature, so students can explore their passions without the pressure of gender stereotypes, Is delivered by talented teachers who strive to provide individual attention, respond creatively to new learning developments, and who are always learning too through extensive professional development.
