Graphic Design in Sydney, NSW Kudos Studio is a graphic design studio based in Sydney. Our team of Graphic Designers and Mac Operators has a broad skills base allowing us to specialise in a variety of design styles from albums and billboards for the entertainment industry to annual reports and journals in the corporate world. We also have Sydney desktop publishers and specialists in design and layout of catalogues and brochures for the industrial sector. Kudos also has extensive experience in pre-press and print so we can organise all your print requirements. Kudos is a service driven, production-based, visual communications company specializing in promoting 'below the line' to a wide variety of specialised clients. We provide a complete range of design/marketing services and solutions. Marketing today must show results and it is becoming more difficult to justify the expense budget. Our reputation is at stake with everything that we produce as a large in-house marketing/design division. There has been a swing away from the traditional and expensive advertising agencies towards businesses with lower overheads with equal, if not more efficient, marketing results. Kudos offers you all the benefits of your own expanded marketing/design division, but on an 'as required' basis therefore minimizing your costs. As well as this, the Kudos design and pre-press service ensures that not only do you receive the quality that you demand, but you also receive your jobs on time. Kudos offers value for money and always a competitive rate for your art, creative, prepress and print requirements. We are also happy to quote or tender on a project basis so you know exactly the direction that you can head with your specific concept, requirements and always with your budget in mind. This is just part of the service from the Kudos team where we aim to provide excellence in all that we do.
