Australia

Phone: 08 8927 2756

Aged Care Accommodation in Darwin, NT Golden Glow Nursing was established in 2001 by two Darwin nurses who saw a need to provide quality nursing care to people who did not require hospital level care, but needed health care support to be able to maintain a safe, healthy life style in their own homes. Golden Glow Nursing is a Darwin based private nursing facility accredited with the International Standards Organisation (ISO 9001:2015), with a strong commitment to provide nursing care that follows the principles of Best Practice and Primary Health Care. Our qualified, caring staff provide tailored health & home care services, allowing our clients to remain in their own comfortable surroundings at home, while receiving high quality nursing and home support specific to their personal needs and choices for care. Our aim is to provide a comprehensive quality service that is client focused and respects the rights and dignity of the individual, as well as enabling clients to live independently and safely. Our care services will enhance and improve quality of life of both the clients and their families, making everyone secure in the knowledge their beloved ones are being taken care of at all times, with a service plan tailored to the needs of every individual client. Our company has also established a strong relationship with Charles Darwin University, allowing students to work alongside qualified nursing staff during their community placement. This working relationship helps to build and maintain a qualified workforce within the Territory.
