Child Care & Day Care in Brisbane, QLD Guardian proudly own and operate 96 Child Care and Early Learning Centres around Australia. Every day thousands of families entrust us with the care and education of their children. Our vision is to become the highest quality provider of child care centres in Australia, nurturing young children in their early years to fulfil their potential through formal schooling, lifelong learning, into wider life and employment. We believe children need to be prepared with a set of skills and aptitudes so they can become active participants in an increasingly complex, globally-connected and changing world. Our early education approach is designed to build confidence and initiative, helping children to develop successful social relationships, resolve conflicts and become emotionally resilient. Our name, Guardian, reflects our vision in that we are custodians of tomorrow's world through the children of today. Every aspect of a Guardian child care centre follows an approach to early childhood learning we term 'The Guardian Way'. The early years are the most critical stage of a child's development and at Guardian, we believe we have a responsibility to do all we can to optimise a child's developmental experience during their time with us. We do this by: Staffing our centres with a team of exceptionally qualified and caring educators who ensure our children are safe, respected and loved in high quality and naturally-inspired environments and; Applying a developmentally appropriate content-rich Guardian Curriculum inclusive of literacy, numeracy, science, art, music, and language within which our children can develop socially, emotionally, cognitively and physically. We recognise that our families are our customers and strive to provide them with thoughtful and meaningful service that makes it easier for them to balance their family and work commitments.
