Watch Repair in Sydney, NSW We service: Mechanical, Automatic, Chronograph, Co-Axial and quartz watches. All complete overhaul services come with 1 year warranty. A mechanical watch contains on average 150 parts, some of which experience high forces on a continuous basis. To keep the performance of your watch at its best and prevent wear and tear, it will need to be regularly serviced: usually every three to five years. If you're unsure about when your watch needs servicing or have a problem with your watch that needs repair, we can help. We offer you Overhaul, service, restoration; Battery change, water resistant watches; re-sealed and pressure tested; Glass replacement; Winder, main-spring replacement; Dial restoration; and Large selection of Italian made leather straps. We also stock stainless steel metal bands and rubber straps. Important! We cannot give watch repair quote over the telephone or email, it needs visual inspection. We specialised in the following watch brands: Omega, Longines, Tag Heuer, Raymond Weil, Rolex, Tudor, Breitling, Tutima, Glashutte, IWC, Rado, Certina, Baume & Mercier, Cartier, Davosa, Doxa, Eterna, Marvin, Gucci, Maurice Lacroix, Mido, Milus, Movado, Oris, Seiko, Citizen, Tissot, Zenith. Official service centre for Tutima - Glashütte, Rosendahl, Arne Jacobsen, Morellato, Sector watches. Like a car, a mechanical watch needs to be lubricated regularly to keep it running smoothly. Over time, the oil will deteriorate and friction between the movement's part will increase, causing abrasion and making the watch less accurate. In addition, the friction can create a very fine dust that will itself act as an abrasive on the watch movement parts.
