Building Society in Melbourne, VIC Big Sky is an Australia-wide financial services organisation serving customers spread throughout metropolitan, regional and remote Australia for over 40 years. A subsidiary of Australian Unity, Big Sky has a comprehensive and competitive range of products and services spanning banking, advice and insurance. As an organisation that returns profits to our customers through competitive interest rates and attentive service, Big Sky is a genuine alternative to the big banks. Like the banks, we have a comprehensive range of financial products and services and we operate under the same regulations and share the same government guarantees on our savings products. But unlike the banks, we are not beholden to shareholders. This difference is critical as we are not conflicted at any point in our dealings with our customers. Our approach is simple; we aim to help our customers meet their financial needs over the course of their entire life, from financial literacy in childhood right through to income maximisation in retirement. Our customers tell us we're warm and friendly, and in many instances, that trust now extends over decades and amounts to assisting up to 4 generations of family members.
