Museum in Brisbane, QLD Museum of Brisbane is part of the living history of the city, examining how Brisbane and its people continue to change over time and revealing how each of our individual and collective stories are the milestones of the city's evolution. The Museum explores the seemingly ordinary people and places of Brisbane to uncover unexpected and fascinating stories and delivers a changing program of exhibitions that provoke discussion and thought about the city and its communities. As the iconic symbol of our city's heart, it is only fitting that City Hall should continue to provide a place where residents of the city, along with interstate and international visitors, can discover and explore the people, places and stories of Brisbane. Up on the roof of City Hall the Museum provides an oasis in the city, housing five galleries, a theatrette, and the Dome Lounge. The mission of Museum of Brisbane is to research and present a changing program of high quality exhibitions that explore and present all that is Brisbane, to establish itself as a museum of national significance by creating rich cultural experiences that inform, educate and entertain.
