Concrete and Cement in Darwin, NTHalkitis Brothers is a company of many different components, all working in sync to sustain the momentum of the greater machine. However, it is the flesh and blood elements, with their knowledge, enthusiasm and pride which push the machine to the limits, making it faster, better and stronger. We pride ourselves in being a family owned company, and plan to keep our business within our family, that it's also our team. Since 1992 HB Concrete has been one of the leading suppliers of concrete products in the Northern Territory. We provide concrete supplies for the development of residential, commercial and industrial projects. We mine aggregates (raw material) direct from our quarry at Mount Bundy and transport them to our processing plant in Winnellie. It is here we produce customised concrete products for all your construction requirements. These materials can then delivered by one of our 12 agitator trucks to any job site. Our vision is to be the leading producer of construction materials in the Northern Territory and to continually expand and diversify our services to meet industry and customer demand. Our commitment to providing quality construction materials has seen our activities steadily grow, employing over 140 local staff. This success has allowed us to expand operations to include commercial and residential construction, manufacturing, tourism, mining, transport and maintenance. At HB we are looking at ways to efficiently use our energy and reduce carbon emissions as a result of our

operational activities
