Installation trade Services in Alice Springs, NT BT Remote Solutions is based in Alice Springs, centrally located to service the NT and all outback regions. We offer a number of services from electrical and plumbing contracting to water pumping, solar systems for home and caravans. BT Remote Solutions specialises in the design and installation of all sizes and types of PV systems ranging from domestic through to large commercial, off grid and hybrid systems. BT Remote Solutions has now expanded our business into aerial photography, aerial surveying and 3D mapping. BT Remote Solutions can service all your general local and remote electrical requirements, including installation of split system air conditioners. At BT Remote Solutions, we can carry out servicing and cleaning of your solar system. We can design, supply and install solar power solutions for your caravan, motorhome or camper trailer. We have over 17 years experience in the solar industry, ranging from domestic grid connect solar systems and commercial solar systems through to small and commercial standalone. We can design, install and maintain a high quality system to meet your requirements. We use panels supplied by Jinko Solar. We are also an accredited Solar Edge installer. Ongoing maintenance of your solar system, once it is installed, is also important and we can assist with providing that service so that you get the greatest ongoing returns out of your system. It is recommended that PV systems are cleaned and serviced at least every 18 months, as per Power Water Corporation requirements
