Australia

Phone: : (08) 9242 5465

Bricklaying in Rockingham, WA For more than 67 years Midland Brick has been the go-to company for bricks and pavers in Western Australia. Recognized for our innovation, quality and extensive range, Midland Brick manufactures one of Australia's largest collections of bricks and pavers, and that's not all. Midland Bricks' products now extend to retaining walls, terracotta roof tiles and stone wall cladding. Since 1946, Midland Brick has been making and supplying bricks and pavers for the many thousands of homes, schools, hospitals and commercial buildings that, at some stage, most of us would have come in contact with. We are immensely proud of our heritage and contribution to this wonderful State and never take for granted the trust that West Australia's builders have placed in us and our products. 70 years on from our modest beginnings we have grown into one of the largest brickworks, employing the skills and talent of hundreds of West Australians in making the best bricks in the world. And to ensure we maintain these high standards, we invest heavily in new plant and equipment, over \$100m in the last decade.
