Graphic Design in Brisbane, QLD We are Juno, a small team of diverse and humble creatives, specializing in branding, print and digital design. In business for over 10 years (and over 30 years design experience between us!), we've worked with businesses of all sizes including, fashion labels, photographers, musicians, retailers, advertising agencies, restaurants, accountants, business consultants, fitness, financial planners and more, from all around the country. We live to create. In fact, outside of 9-5, you'll find us pouring over design blogs and magazines, spending way too many hours on Pinterest and pursuing our own personal creative endeavors. Understanding your needs, expectations and goals is crucial to developing a solid strategy and the best outcome for your brand. Research is key - we work with you to ensure we have a strong understanding of who you and your target market are. Moving into the design process we work closely with you to ensure a highly refined design regardless of the medium. The purpose of a logo is not to describe your business literally, but to identify your business or product through the use of a mark or symbol. Your logo is an important component of your business or product's visual identity. It's important to gain an understanding of your businesses purpose, objectives and target market so we can develop a logo that will set your business apart from its competitors and provide the foundation for your brand identity. We work with small business owners, through to large companies to create visually appealing logos that are simple, unique and memorable.
