Beauty Salon in Townsville, QLD We specialise in brow feather tatoo and VPL hair rduction treatments, as well as spray tanning and skin rejuvenation. Variable Pulsed Light is a safe and effective technology for treatment of unwanted hair. The variable pulses of light emitted from the VPL™ effectively treat and remove unwanted hair safely and easily, with none of the discomfort of invasive and/or surgical treatments. Variable pulsed light ensures controlled absorption of light by the target chromophore whilst minimising heating of the surrounding tissue. Each light pulse consists of a sequence of rapid micro-pulses. The number, duration and frequency of micro pulses can be adapted on the 'pulse design screen', to suit each patient, ensuring optimum treatment results are achieved every time. as for our spray tanning services, gone are the days of streaky orange tones and patchy, fast-fading treatments! our professional tan provides a naturally bronzed look and is made from natural ingredients that nourish the skin. Come meet us and see evrything we have to offer, from IPL to tanning and beyond!
